

WHITEPAPER

INTRODUCTION

In 2009, the first ever decentralized payment network was introduced by SATOSHI NAKAMOTO, the mother of all coins, Bitcoin. Followed by years, global interest grew and Bitcoin inspired the genesis of numerous cryptography based projects that also worked towards trustless secure payment systems and storage of value.

Bitcoin uses blockchain technology where a distributed ledger records transactions chronologically and publicly. Subsequent advancement in the space gave rise to second generation projects like Ethereum, Litecoin, EOS and many others, which built on this concept by adding new features, and sometimes by acting as platforms for dApps - the execution of decentralised applications.

BACKGROUND

Ethereum is an open source, public, blockchain-based distributed computing platform and operating system featuring smart contract (scripting) functionality. It supports a modified version of SATOSHI NAKAMOTO consensus via transaction-based state transitions. Ether is a cryptocurrency generated by the Ethereum platform and used to compensate mining nodes for computations performed. Each Ethereum account has an ether balance and ether may be transferred from one account to another.

A1 Coin is an ERC20 Token build in Ethereum Blockchain for it's transparency and highly secure protocol. It allows all A1 token holder to use Ethereum Blockchain and all type of ERC20 Wallets within the network. In this case our developer followed all important steps that need to pass and verify the code for securing the A1 Coin.

IMPORTANT CONSIDERATION

This document is confidential and by accepting delivery of this document, you agree to keep confidential all information contained herein. The document is a marketing document and is not intended to be legally binding.

Nothing in this document shall be deemed to constitute a prospectus of any sort or a solicitation for investment, nor does it in any way pertain to an offering or a solicitation of an offer to buy any securities in any jurisdiction. The information in this document does not constitute a recommendation by any person to purchase A1 COIN or any other cryptographic token or currency and neither the Issuer Planet Exchange Limited has authorized any person to make any such recommendation.

Restricted Persons. The sale of A1 tokens is not directed at, and each purchaser of A1 tokens will be required to represent, among other things, that they are not: (a) a citizen, resident (tax or otherwise) of, a person located or domiciled in, or any entity organized in or owned by certain persons in (i) the United States (including any U.S. Person pursuant to the U.S. Securities Act of 1933 (as amended)), (ii) Canada, (iii) any jurisdiction listed by the Financial Action Task Force as high-risk or with strategic deficiencies; (iv) Cuba, Democratic People's Republic of Korea (North Korea), Iran, Pakistan, Syria, the Government of Venezuela or Crimea or (v) any jurisdiction for or in which the sale of A1 tokens, or any offer or solicitation in respect of A1 tokens, would require registration or licensing not obtained by the Issuer or otherwise would be unlawful or which restricts or licenses the activities of the kind that can be accessed or used with A1 tokens; or (b) a person under the age of 18 years (any such person falling under (a) and (b) a "Restricted Person").

In addition, each purchaser of A1 tokens will be required to represent that such purchaser is outside of the United States at the time of agreeing to purchase the tokens, was outside of the United States at the time any offers to sell or any offers to buy the token were reviewed, and will be outside of the United States at any time that such purchaser performs its obligations under the Token Purchase Agreement.

Consequently, you must make your own assessment as to your ability to purchase A1 tokens pursuant to laws applicable to you and to confirm that you are not a Restricted Person. No registration or other action has been or will be taken in any jurisdiction that would, or is intended to, permit the sale of A1 tokens in any country or jurisdiction where registration or other action for that purpose is required. None of the Issuer or any of their respective agents or representatives, is making any representation to any potential purchaser of A1 tokens as to the legality of a purchase of A1 tokens by such purchaser under the laws applicable to such purchaser

Private Presentation. This White Paper is being delivered only to selected persons, and not through any general solicitation or general advertising. You may not, nor are you authorized to, deliver or disclose the contents of this document to any other person. No person is authorized to provide any information or to make any representation not contained in this White Paper or in the Token Purchase Agreement.

No person or entity other than the Issuer is authorized to sell, resell, or distribute the A1 tokens on behalf of the Issuer, or any of their affiliates. Purchasers of A1 tokens, or any interest therein, from any person or entity other than the Issuer are not entitled to rely upon this White Paper or the Token Purchase Agreement. Risk Factors.

Purchasing the A1 tokens entails risks and purchasers could lose their entire purchase amount.

Certain risks are described in the Token Purchase Agreement.

KEY RESPONSIBILITY

You are responsible for implementing reasonable measures for secure access to the device, wallet, vault or other storage mechanism you use to Purchase, receive and hold A1 Tokens you Purchase from us, including any requisite private key(s), usernames, passwords or other login or credentials necessary to access such storage mechanism(s).

If your private key(s) or other access credentials are lost, you may lose access to your A1 Tokens. We are not responsible for any such losses. You understand and agree that all Purchases of A1 Tokens are non-refundable and you will not receive money or other compensation for any A1 Tokens purchased.

KYC PROCEDURE

KYC process. You accept that you will receive your A1 ONLY after having successfully passed through our KYC process. This means that A1 will not be distributed until you have passed through this screening successfully. If you fail to pass the KYC screening you will not receive your A1. In the case that you do not successfully pass the KYC screening, You are agree that the company will hold your funds until the A1 are fully distributed. You agree that the company may use your submitted information in any way required by law or deemed necessary and that your funds used to purchase A1 will not be refunded.

A1 Coin and its lightning-fast transactions driven platform aims to transform the landscape of many other industries like marketing, advertising, hosting, domain registration, bidding, medicine, real estate, space research, Ecology, electronics, clothing, etc and other human endeavours of the present and future.

The platform allows users to buy/sell products and services with the help of the native A1 tokens with hassle free transactions. In a world full of vague cryptocurrency projects that promise nothing, A1 is grounded in its belief that with the right kind of transparency and quality, it can offer something concrete and worth investing in for backers around the world.

Amidst the recent surge in ICO projects, most of the companies ensure that the technology is still under their control and is not fully decentralized. This is risky for individuals as they end up losing their money to scams out to con blockchain project enthusiasts. A1 coin identifies the need to have a one-stop platform for such enthusiasts to invest safely without worrying. A1 coin's primary focus is making blockchain use an everyday-thing, and this is made possible by its fast transaction speeds. To top to the convenience of efficient transactions, participants can engage in additional industries ranging from medicine, real estate, cybersecurity, advertisement and environmental conservation using A1 coin tokens.

Provide a platform for e-commerce merchants to expand their online payment solutions and accept mobile payments in Ethereum-based currencies. Show the potential of "TrustLevel" mechanism which will help to increase the transparency of e-commerce, which both merchants and clients will benefit from. We have developed a solution where the merchant receives a A1 payment gateway script that can be integrated into any shopping cart or website (some scripting knowledge is required). The workflow is simple: the user picks items he or she wants, adds them to the basket and selects to pay with ETH.

A1 servers generate a QR code with all the needed underlying order information such as order number, price, currency, warranty, delivery option, etc. The client must scan the code during a defined time limit otherwise he needs to re-initiate payment. After the client scans the code with his preferred mobile crypto wallet and presses "send", the transaction is sent to the block chain together with purchase details. Once the transaction has received several confirmations, the client is notified it was successful. After a few minutes, the merchant sees the money arrive in his wallet.

During further development phases, we will introduce Merchant Smart Contract Wallet to enable rates, limits, and auStefanatic exchange to local currency. We aim to integrate with merchants in early Beta product stage, and together with them, improve and test the solution. Early participation will allow them to influence what features should be included in the roadmap. It will also enable them to expand their market reach, and through a simple setup to start accepting online payments with ETH. After its launch, we will invite merchants to Beta programs to experiment with the newly introduced features.

The A1 Coin project will encompass the novel ideas of cryptocurrencies and asset management through decentralized ledgers, based on blockchain technology. We will build an online platform that will introduce to the market real estate initially deriving from distress asset at favorable prices. Until recently that type of deals in the region were mainly accessible only to large scale institutional and wealthy private investors because of their size and complexity to purchase.

The platform will serve as interaction hub between A1 token holders and the fund itself. Users of the platform will be able to see the latest projects, planned acquisitions, properties available for sale and for rent. It will use blockchain technology to verify real estate transactions that will be available for participants using A1 tokens.

Through the strategic use of A1 tokens Estates will create its own ecosystem driven by the platform. The aim is to maximize the growth possibility of the A1 token value through utilization of tokens in real life and to ensure that, the users of A1 tokens, the fund, the parties that we partnership with and in general also wider community, all benefit. Through the consultative management of the fund, up to 40 percent of issued A1 tokens will be kept as a liquidity fund. This means that because a large amount of traffic is expected in certain periods by token use, A1 can ensure that in these peaks of token demands, they will be able to partially assist with supply of tokens on a market, but only up to 50 percent of requested amount at market price. Highest percentage possible of maximum 40 percent will always be maintained as an operating liquidity pool, so those who use A1 tokens will have the ability to convert the funds back into Fiat currencies through our partner payment providers. This added liquidity will ensure that the Fund is also able to manage the properties within it effectively, never maximizing the Fund into capital, killing the liquidity element of the Fund. In doing so it ensures that there is a full operating capital element and small protection element for A1 token users.

SCENARIO EXAMPLE

Stefan is an A1 token holder and thinks that renovation of a property in Croatia in South East Europe has most potential of all available projects. So, he places his vote through the platform. Because other token holders also choose this as a good opportunity, Elements Estates team decides to renovate, improve and put this property for holiday rental during summer months and also for sale. Stefan can now use his A1 tokens for his vacation in this property and also benefit from a higher demand for token in case of the sale. The

A1 platform sells this property after the high touristic season (50 percent of tokens used for purchase of this property is locked-down for a 3 year cycle period). Taking all this in consideration the value of the A1 token has potential to increase due to higher demand for tokens and constantly decreasing number of available A1 tokens on market because of lock-down mechanism. In case Stefan would not hold A1.

A1 token he would be able to change his fiat currency to A1 tokens over exchange or purchase property in fiat currency from platform and Elements Estate platform would exchange fiat currency to A1 tokens on exchange for a small fee, in shortest time possible, according to the rules and limitations set for this transaction. The terms will be governed by smart contracts in which we will incorporate conditions that will assure a safe and clear process.

INTO MEDICAL FIELD

A1 Coin will enable users to give conditional access to different healthcare agents such as doctors, hospitals, laboratories, pharmacists and insurers to interact as they see fit. Each interaction with their medical data is auditable, transparent and secure, and will be recorded as a transaction on A1 Coin's distributed ledger. During this process, the patient's privacy is protected at all times. A1 Coin is built on the permission-based Hyperledger Fabric architecture which allows varying access levels; users control who can view their records, how much they see and for what length of time. By empowering users, we can build the future of healthcare together.

A1 Coin will be a platform for other digital health applications to develop on; users will be able to sign for these applications and services which are powered by their health data and secured by smart contracts. A1 Coin is currently developing two applications to work alongside the platform: a doctor-to-patient telemedicine application and a health data marketplace.

The telemedicine application will enable users to consult a real doctor remotely (for example, on their phone) for a small fee payable directly to the doctor. The Marketplace enables A1 Coin users to negotiate commercial terms with third parties for alternative uses or applications of their personal health data. For example, putting forward their data to be used in medical research. It is intended that A1 Coin and others will contribute many more applications to the platform - helping bring value to all stakeholders.

At present, electronic health records (EHR) are stored on centralised databases in which medical data remains largely nonportable. Centralization increases the security risk footprint, and requires trust in a single authority. Moreover, centralised databases cannot ensure security and data integrity, regardless of de-identification and controlled access requirements. Centralised health databases are legally a requirement and necessity in most countries worldwide and therefore require an added layer of technology to improve their portability and security. As cybercrime around the world is on the rise, healthcare systems are no exception as shown by recent high profile ransomware hacking. In fact, the healthcare industry has more data breaches than any other sector and medical records are being stolen and passed on.

LEGAL

After assessing all the aspects of possible legal and regulatory frameworks as per our business model and plans, the parent company has been already setup i.e. Planet Exchange

REG NO :RC1315620

TAX ID : 19576153001

A1 Coin is also in the process of acquiring a European Incorporation soon.

And after that A1 will be EU GDPR compliant. A1 will start operations from the European Union. Going ahead, we will also investigate country-specific regulations for further expansion.

A1 Coin will not be functional in countries with crypto regulations.

DISCLAIMER

This document and all other documents published in association, relate to a token offering to contributors for the development and use of this platform by various users. The whitepaper has not been examined by any regulatory authority, thus barring any action to be taken by regulatory authorities under any jurisdiction. A1 Coin disclaims all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from: i. Reliance on any information contained in this document, ii. Any error, omission or inaccuracy in any such information, iii. Any action resulting therefrom, or iv. Usage or acquisition of A1 Coin products and services, available on the website and other electronic platforms.

Furthermore, this document does not endorse any offer for securities or a promotion, invitation or solicitation for investment purposes. The terms of the contributions are not intended to be a financial service offering document or a prospectus. Token purchase is subject to risk and does not represent equity, shares, units, royalties or rights to capital, profit or income in the platform or software or in the entity that issues tokens or any other company or intellectual property associated with the platform or any other public or private enterprise, corporation, foundation or other entity in any jurisdiction.
